

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LONDON:
PRINTED BY WILLIAM CLOWES AND SONS, LIMITED,
STAMFORD STREET AND CHURCH LANE

NOTICE.

This Index embraces all the various collections of deeds in the Department, namely, the Royal, Cotton, Harley, Sloane, Campbell, Lansdowne, Topham and Wolley Charters, together with the Additional and Egerton Charters acquired up to the year 1882 and a special series of Church Briefs. The Stowe Charters, acquired in 1883, have already been indexed in the *Catalogue of the Stowe MSS.*, 1895-1896; and an index to Charters before the Norman Conquest will be found in Vol. IV. of *Facsimiles of Ancient Charters in the British Museum*, 1873-1878. The more important entries, however, in the latter have also been inserted here. The present volume is confined to the topography of the Charters relating to the British Isles only, reserving for the present all Foreign documents. Headings of personal names, Religious Houses, and subjects will be dealt with in future volumes. A list of the contractions employed is subjoined.

One of the chief points of interest and value of this Index lies in the evolution of modern place-names from the early forms found in the oldest documents, which have all been carefully traced by means of full cross-references. At the end will be found an Index to places collected under their respective Counties, and additions and corrections to the whole Index which were overlooked during the passage of the sheets through the press.

The original compilation of the slips from the descriptions of Charters was the work of the Department generally; but the labour of final revision and collation has devolved upon Mr. Ellis and Mr. Bickley, two of the Senior Assistants, under the direction of Mr. Warner, Assistant Keeper of MSS.

EDWARD J. L. SCOTT,
Keeper of the MSS.

1 February, 1900.
